

## **Alternate Disinfection Techniques**

### **MOE Director Approved 0.3 CE Units, 3 hour course**

This course introduces attendees to a number of disinfection options - other than chlorine.

Discussion will take place regarding the advantages and disadvantages of ultra violet (UV), ozone (O<sub>3</sub>), on-site hypochlorite generation, chlorine dioxide and the “family” of processes known as advanced oxidation.

At the conclusion of this course, attendees will have a better understanding of the processes mentioned above and be in a better position to make operational decisions regarding the best method for their particular application.
